Born April 1st, 1986

Ahmed El-Hassany

Education

- 2015–Summer 2019 **PhD student**, *ETH Zürich*, Switzerland.
Advised by: Prof. Laurent Vanbever
- 2009–2011 **M.S. Computer Science**, *University of Delaware*, Newark, DE, USA.
- 2003–2008 **B.Sc. Computer Engineering**, *Islamic University of Gaza*, Gaza, Palestine.

Professional Experience

- June – Sept. '18 **Software Engineer Intern**, *Facebook*, Menlo Park, CA, USA.
■ Start practical network verification initiative.
■ *Technology used*: Python, Thrift, Mercurial.
- June '15 – Present **Research Assistant**, *ETH Zürich*, Switzerland.
■ Network-wide Configuration Synthesis <http://synet.ethz.ch>. Published in [1, 2, 10].
■ Software-Defined Networks (SDN) verification <http://sdnracer.ethz.ch>. Published in [3, 4, 6].
■ *Technology used*: Cisco IOS, BGP, OSPF, Python, SDN, Z3, Git.
- Spring '15 **Research Associate**, *Indiana University*, Bloomington, IN, USA.
■ Measured garbage collector and data serialization overhead for unstructured data.
■ Developed efficient method for representing unstructured data in Haskell's runtime system. Published in [5].
■ *Technology used*: Java, Git.
- July '13 – Nov. '14 **Research Scientist**, *International Computer Science Institute (ICSI)*, Berkeley, CA, USA.
■ Worked with Prof. Scott Shenker group on designing and building next generation SDN architecture (SDNv2).
■ Designed and implemented integration plans to implement a research system for quality assurance to run in production with ONOS; a carrier-grade SDN open source network operating system <http://onosproject.org/>. Published in [7].
■ *Technology used*: Python, Java, Continue Integration QA, Git.

- May – July '13 **Summer Student**, *Lawrence Berkeley National Lab.*, Berkeley, CA, USA.
- Worked with the Energy Sciences Network (ESnet) team.
 - Designed and developed scalable multi-domain Topology Service for dynamic multi-domain network circuits' setup.
 - *Technology used*: Java, Jetty, Atmospher Framework, REST API design, MongoDB.
- Aug. '11 – July '13 **Research Associate**, *Indiana University*, Bloomington, IN, USA.
- Designed and developed a RESTful Unified Network Information Services (UNIS) to represent topologies for large-scale multi-domain networks.
 - Designed and developed instrumentation and monitoring APIs and tools for GENI experiments and physical infrastructure; <https://github.com/periscope-ps/unis>.
 - *Technology used*: Java, Python, Tornado, REST API design, MongoDB, Django, Git.
- August '10 **Summer Student**, *Lawrence Berkeley National Lab.*, Berkeley, CA, USA.
- Worked at the Center for Enabling Distributed Petascale Computing (CEDPS) project.
 - Designed and built system to collect, represent and analyze large scale monitoring data for high-speed data transfers in DOE networks.
 - *Technology used*: Python, Tornado, JavaScript, HTML, JQuery, MongoDB, Django, Git.
- Feb. '09 – July '09 **Software Engineer**, *Municipality of Gaza*, Gaza, Palestine.
- Designed a system to extract information, categorize and archive old, from late 1800s, building permits.
 - Designed new business process and the required software for issuing building permits in Gaza.
 - Lead a team of 50 civil engineers and 20 data entry persons to implement the project.
 - *Technology used*: Oracle DB, Visual Basic .NET, Delphi.
- Dec. '08 – Mar. '09 **Independent Consultant**, *Palestinian National Internet Naming Authority (PN-INA)*, Gaza, Palestine.
- Software quality assurance of in house built system for registering managing all .ps domain names; PNINA is the country code top-level domain (ccTLD) for Palestine.
 - Consulting on deployment and integration for new domain registration system.
 - *Technology used*: PHP, Perl, PostgreSQL, MySQL, BIND, Apache.
- June – Sept '08 **Student Developer**, *Google Inc. & Internet2*, Google Summer of Code 2008.
- This project is sponsored by Google and administrated by Internet2.
 - Designed and developed open source web based configuration tools for perfSONAR-PS.
 - *Technology used*: Perl, JavaScript, Apache, HTML, CSS, SVN.
- Sep. '07 – Mar. '08 **Software Engineer**, *AfkarIT*, Gaza, Palestine.
- Designed and developed operating system level virtual machines monitoring system for VMWare ESX Infrastructure.
 - *Technology used*: Python, C#.
- Sep. '04 – Oct. '05 **Contractor Software Engineer**, *Ard El-Insan*, Gaza, Palestine.
- Designed and developed patients follow-up management system in four clinics for a project sponsored by European Commission's Humanitarian Aid Office (ECHO).
 - *Technology used*: Visual Basic. NET, Microsoft SQL Server.

Awards

- Fulbright Foreign Student Scholarship for Master's program, 2009-2011.
- 2nd place winner team at IEEE/ACM Supercomputer Conference 2009 High Performance Computing Contest.
- Google Summer of Code, 2008.
- Palestinian Prime Minister's special award for undergraduate achievements, 2008.

Activities and Services

- Reviewer: IEEE/ACM Transactions on Networking.
- ParLab Boot Camp – Course on parallel programming, UC Berkeley, 2010.
- SCinet volunteer, ACM/IEEE Supercomputing Conference 2010-2012.
- President of Graduate Students Association for Computer Science Department at University of Delaware, 2010 – 2011.
- From Lab to Market, Fulbright Enrichment Seminar, Austin TX, June 2009.

Presentations and invited talks

Network-wide Configuration Synthesis.

- Computer Aided Verification (CAV'17), <https://youtu.be/dUbfWtHLTCI>, July 2017, Heidelberg Germany.
- Workshop on Network Verification <http://network-programming.org/wnv/>. April 2017. Palo Alto, CA, USA.

BigBug: Practical Concurrency Analysis for SDN .

- ACM SIGPLAN conference on Programming Language Design and Implementation (PLDI'16), talk available at <https://youtu.be/QzYBOc3G9FU>. June 2016. Santa Barbara, CA, USA.

SDNRacer: Concurrency Analysis for Software-Defined Networks.

- ACM Symposium on SDN Research (SOSR). April 2017. Santa Clara, CA, USA.

UNIS: Design and Implementation of a Unified Network Information Service.

- IEEE Conference on Services Computing (SCC). July 2013. Santa Clara, CA USA.
